25X1

- At the station of Kurowo Braniewskie (Kurau-Q55/Z11) on the Braniewo-Elblag (Braunsberg-Elbing) line, trains were observed carrying sand which was being used to widen the existing railway embankment where a new track was being laid. At the moment there are two tracks on the existing embankment, one a broad gauge which has been used by the Russians since 1945, and the other a standard-gauge track used for ordinary Polish traffic.
- the new track being laid on the widened sandy embankment will be a wide-gauge track to be used by the Russians.
